EDGE FABRICATION INC. is a full service, custom fabricator of sheet metal parts or components. Our quick response metal fabrication business model is specifically designed to meet your OEM production needs at a competitive cost. Our fabrication services include tig welding, mig welding, laser cutting, shearing, punching and press brake forming. From fabricating hot/cold rolled steel, to cold forming aluminum, steel or stainless steel, we have exceptional capabilities.

We can fabricate and perforate metal to the most exacting tolerances and in many different ways. From complex assemblies to simple brackets, architectural, industrial, or commercial, Edge Fab has the equipment and service to get your job done right, and on time.

QUOTES WHEN YOU NEED THEM...
